Automata - Practice 3

1 Nondeterministic finite Automata

a Determine the definition of each component in machine $M = (Q, \Sigma, \delta, q_0, F)$ for Nondeterministic

* $Q =$ finite of state

* $\Sigma =$ finite set of input

* $\delta =$ transition

* $q_0 =$ start state

* $F =$ final state

b Find the formal definition of this machine N_1

* $Q = \{a, c, d\}$

$\Sigma = \{0, 1\}$
