

A. Student/User

The student is the primary user of the SmartLost system. Their responsibilities include reporting lost or found items and searching existing records.

Core Functionalities:

- Register and log in to the system
- Report a lost item
- Report a found item
- Upload item images and descriptions
- Search and browse reported items
- Filter items by category, status, or location
- View detailed item information
- Contact the finder or owner
- Track the status of reported items

B. Administrator

The administrator manages and monitors the platform to ensure the accuracy and reliability of reports.

Core Functionalities:

- Review submitted reports
- Verify reported lost and found items
- Approve or reject suspicious reports
- Update item statuses (Active, Claimed, Returned)
- Remove duplicate or inappropriate reports
- Monitor system activity
- Manage user accounts

C. SmartLost System

The system acts as the central platform that stores, processes, and displays information.

Core Functionalities:

- Store lost and found item records
- Maintain item status updates
- Provide search and filtering capabilities
- Match lost and found item information
- Manage user authentication
- Generate notifications and updates
- Securely manage user and item data

Workflow Summary

1. A user reports a lost or found item.

2. **The system stores the report and makes it searchable.**
3. **Other users can browse or search for matching items.**
4. **The administrator verifies and manages reports.**
5. **When an item is successfully recovered, the status is updated to Returned.**
6. **The system records the completed recovery process and updates all relevant information.**
